Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the veneral infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will with the injunities of the first the injunities of the first the result of the seems to be the rod of the first the injunities of the first the result of the seems to be the rod of the first the result of the seems to be the rod of the first the result of the seems to be the rod of the rod will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrofulous constitu-tions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which de-cimates the human family has its origin directly in this serofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or

are aggravated by the same eause. One quarter of all our people are serofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the eure of not only scrofula, but also those other affeetions which arise from it, such as ERUPTIVE and SKIN DISEASES, St. ANTHONY'S FIRE, Rose, or Enysipelas, Pimples, Pustules, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RUDUM, SCALD HEAD, RINOWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPERSIA, DEBILITY, and indeed, ALL COMPLAINTS ARISING FROM TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country allounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our elimete. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefit on the afficted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
